Team

Minwook Song | Founder & CEO

- 10+ yrs rooftop solar development — 153MW built pre-founding
- Former CSO Samsung Solartech
- Former O2O Team lead, H Energy
- M.S. Urban Planning, SNU

Bokyoung Lee | Product Lead

- 10+ yrs product & marketing (PO)
- Leads Solarlease Ops platform & brand

Wangju Lee | Sales Lead

- 7+ yrs energy sales & EPC management
- Partner network — 120+ brokers, 300 inbound leads/mo

Problem

- Korea's industrial power price rose 72% in 4 years, yet RE100 compliance is only 12% — renewable demand far outstrips supply
- High upfront cost and 20-yr operating burden leave idle spaces like rooftops empty — small roofs are ignored by large players

Solution

- Zero-capex subscription — we finance, build, own & operate; owners buy power up to 24% below the utility tariff
- 3 products (power subscription · plant subscription · roof lease) — one for every building owner
- Standardized 7-month development — every roof from 20kW to MW becomes an income-grade asset

Key Features

- AI rooftop underwriting — 98% accuracy, screening within 10 minutes; 3,700 sites (440MW) reviewed to date
- Flat build cost of ₩1.2M (≈US\$900)/kW at any scale · 11 patents across the development cycle (8 granted)
- Rapid build-and-supply engine — graded solar assets sold to institutions

Business Model

- Build-Sell — completed plants sold to institutions (avg margin 31%, 7-month capital cycle)
- Subscribe — recurring subscription revenue (ARR) on power generated by our plants
- Lease — secure idle spaces (roofs · rooftops · parking lots) and develop plants
- Clear split of growth equity (platform) vs asset finance (SPC plants) — company stays asset-light

Business Snapshot

- Profitable in Year 1 — FY2025 revenue ₩2.3bn (≈US\$1.7M), operating profit ₩0.34bn
- 53 sites · 15.6MW contracted/permitted/operating · multiple asset sales to institutions incl. KG Inicis (listed)
- 2029 target: 338MW developed & built · ₩100bn revenue · 204kt CO₂/yr cut · ISO 9001/14001/27001

Seeking Opportunities

- PoC & pilot partners for rooftop solar subscription in Singapore and Asia (Vietnam, Philippines, etc.)
- Asset managers seeking a recurring channel for Korean building-solar assets (Singapore & beyond)
